EDVESTORS WORKS WITH FRONTLINE EDUCATORS

and school and system leaders across Boston to increase the number of schools delivering improved educational outcomes for all students. We are:

- Supporting schools in the difficult work of school improvement
- Investing in problem solving and innovation in classrooms across the city
- Increasing access to quality arts instruction during the school day
- Closing math knowledge and skill gaps for students in grades 3-8
- Expanding career and technical education pathways in Boston high schools

Continuing this important work requires your commitment and investment. Help us build a bright future for all Boston students. Please join us by contributing generously today. You can fill out the attached pledge card or donate online at edvestors.org.

“Issues of equality, opportunity, and the future of our students are too important to be left to others. We must all get involved.”
